SKILLS

- JavaScript (ES5/ES6, jQuery, web APIs), HTML, CSS, SCSS/LESS, git, liquid (Shopify), Webpack, Gulp, Node, Agile, Asana
- Component-based web app development using Vue/React frameworks
- Excellent technical writing and communication skills
- Strong knowledge of Shopify ecosystem & e-commerce space, third party app integrations, web architecture and web analytics

PROFESSIONAL SUMMARY

I am passionate about converting business needs into functional and tasteful solutions. In my current position, I get to work with many different e-commerce brands concurrently. This helps me to better understand and execute the strategies that different web schema intend to serve. I would like to take my diverse experience in the e-commerce and analytics spaces to a position where I can work more iteratively on a single or multiple pieces of software in the long term.

WORK HISTORY

Front-end Developer, 05/2019 to Current
BVAccel - San Diego, CA

- Built Shopify storefronts for various D2C e-commerce brands including Red Bull, Good American, Pit Viper, Freshly Picked, and BioClarity.
- Co-authored starter theme built on Vue.js as part of internal push toward headless Shopify theme development.

Solutions Engineer, 05/2017 to 05/2019
Tealium - San Diego, CA

- Led successful development of campaign tracking code and projects for brands including AutoNation, PVH, Pacific Gas & Electric, Deckers, and Charter.
- Refactored and contributed to an internal UI toolset that automated the team's workflow and made the product more aesthetically appealing.
- Co-authored documentation of solutions to common issues with vendor code, which substantially improved the team's turnaround.

EDUCATION

Bachelor of Science : Behavioral Neuroscience & Philosophy,
2016

University of San Diego - San Diego, CA

Academic Advisor, Delta Tau Delta fraternity, Theta Zeta chapter
